

Web Literacy

A framework for entry-level web literacy and 21st century skills for knowing how to read, write and participate online.

Read

Reading on the web is a critical skill for engaging content online. They can be viewed as “exploring,” or “navigating the web.”

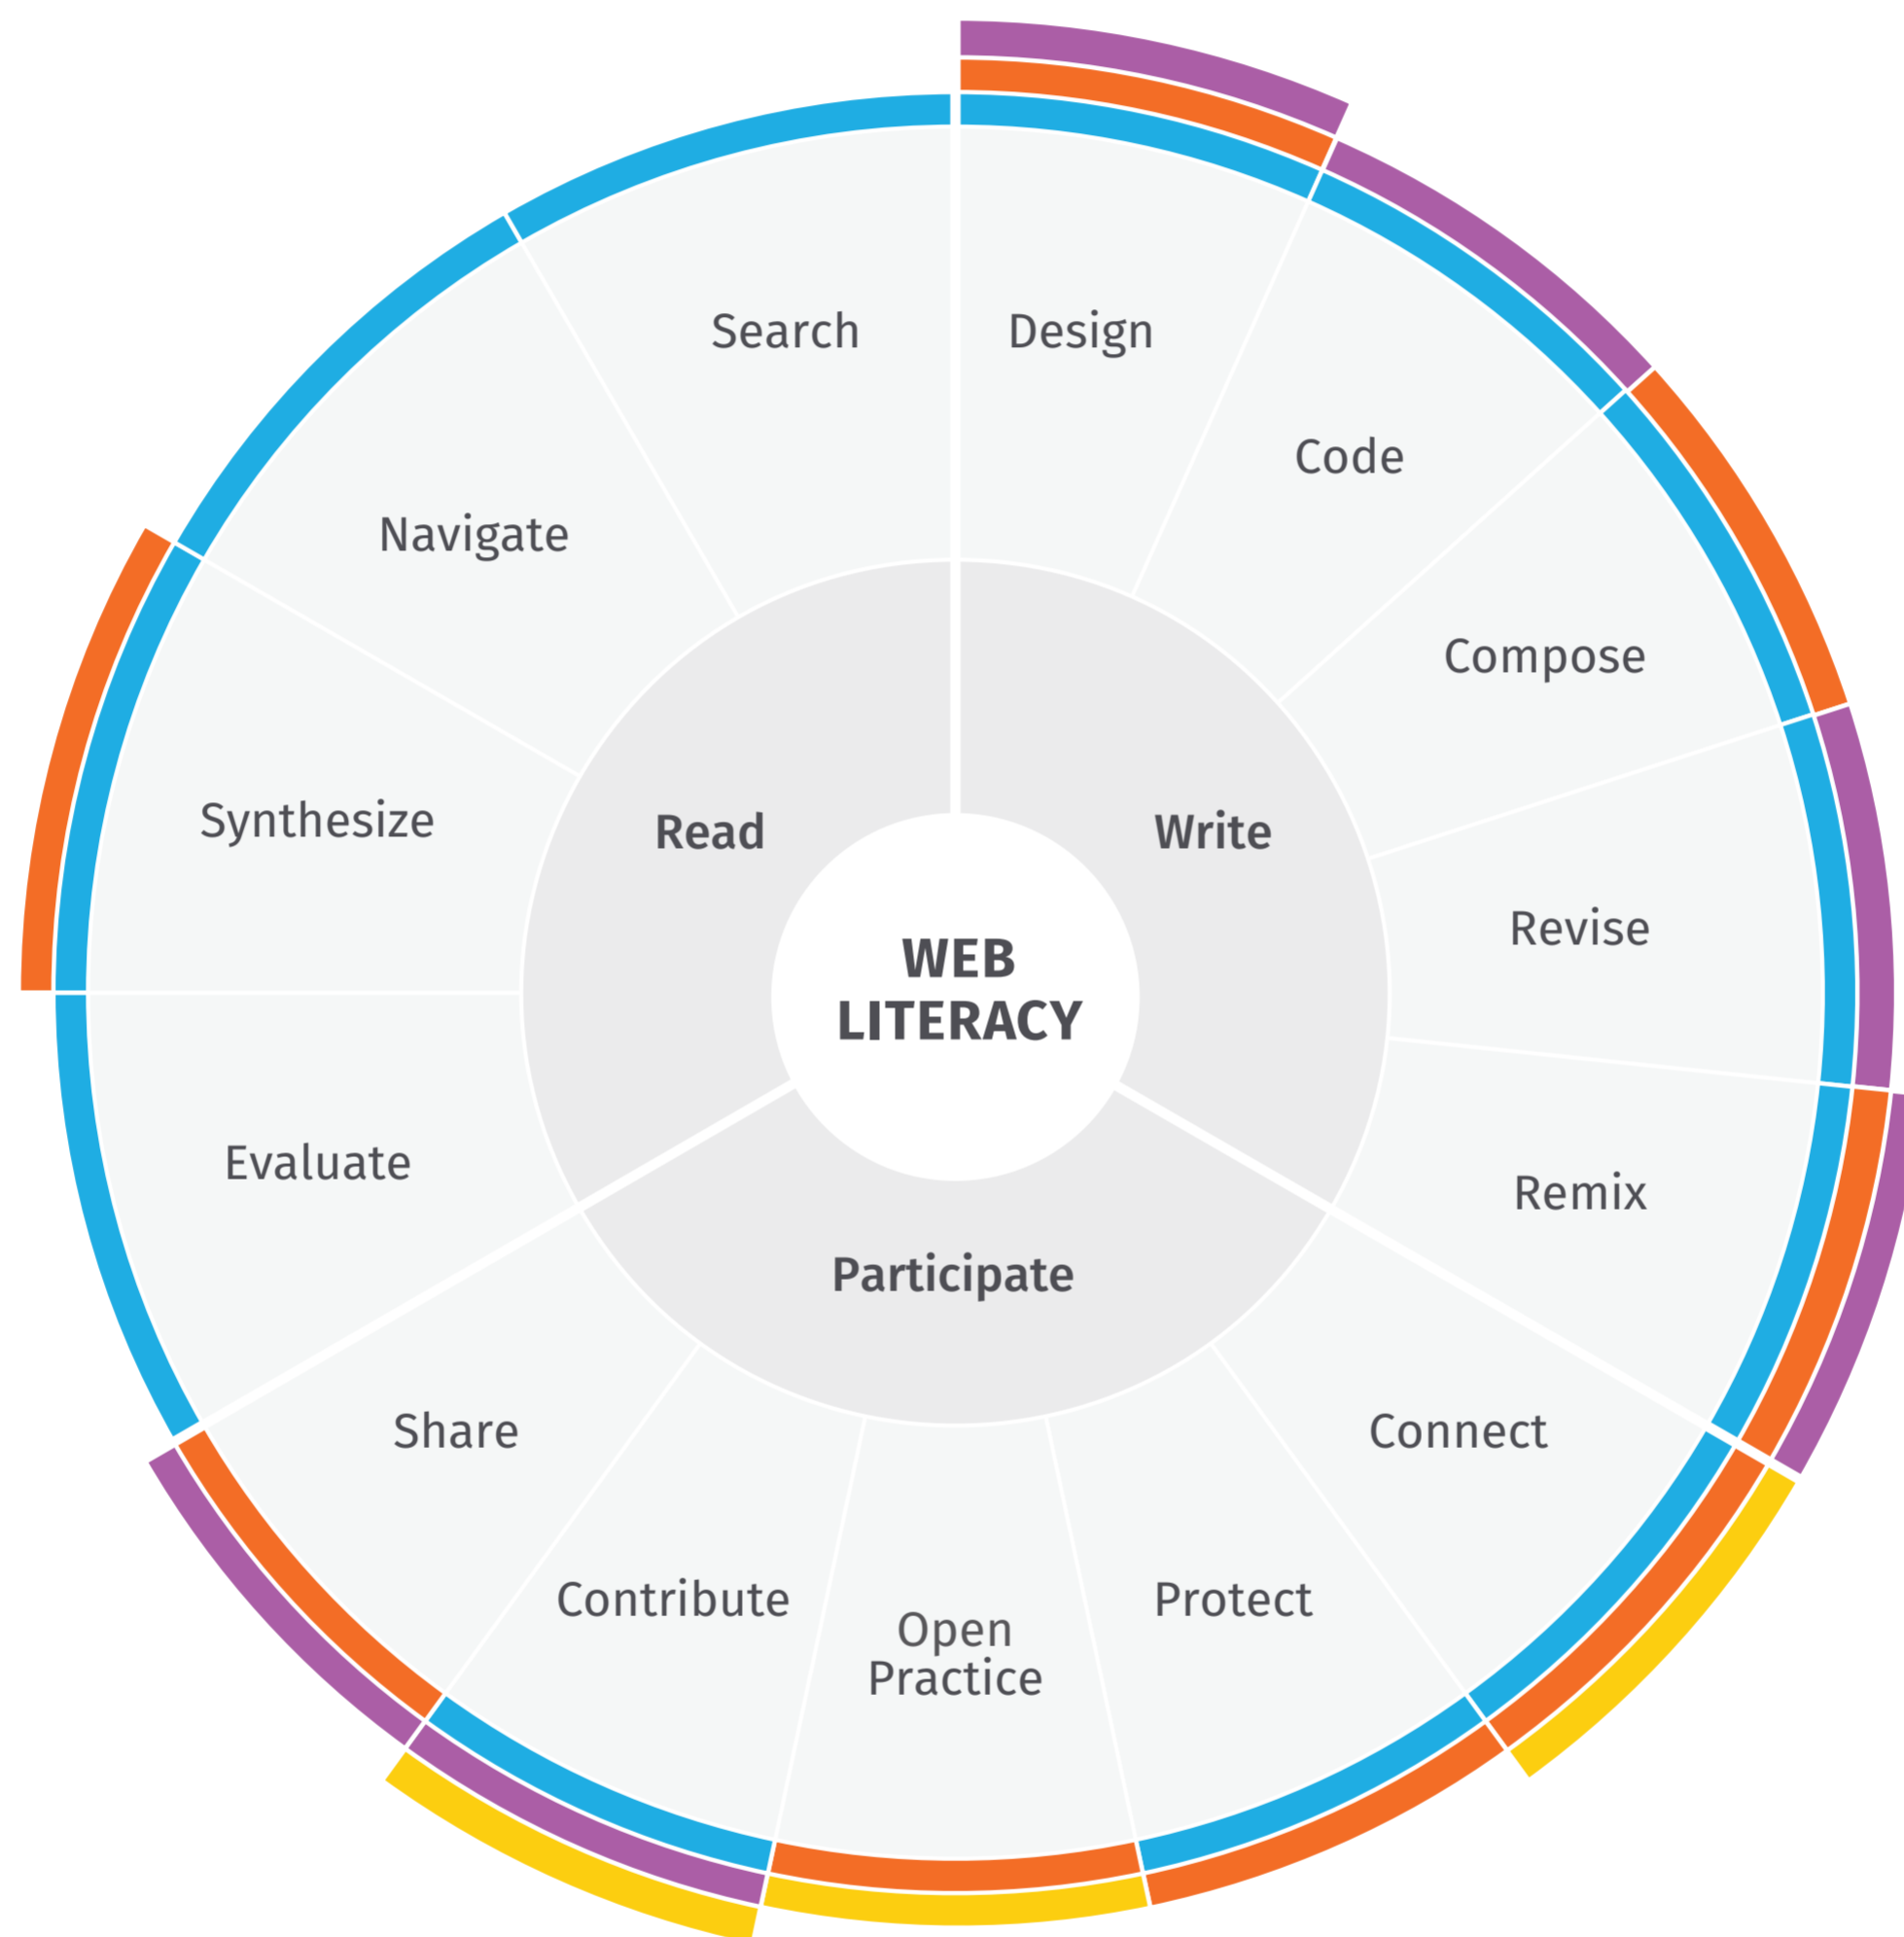

Write

Writing on the web enables one to build and create content to make meaning.

Participate

Participating on the open web includes connecting with the communities that share, build, and sustain meaningful content online.

21st Century Skills

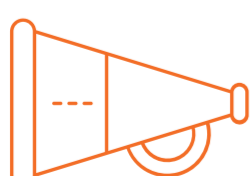

Problem-Solving

Using research, analysis, rapid prototyping, and feedback to formulate a problem and develop, test, and refine the solution/plan.

Creativity

Generating, connecting, synthesizing, transforming, and refining ideas.

Communication

Understanding and presenting verbal and nonverbal messages effectively.

Collaboration

Being audience and culturally aware, resolving conflict appropriately, using technology tools effectively, and taking responsibility for personal and group productivity.
